DFI 41st Annual Conference on Deep Foundations

We are pleased to announce that UniSoft GS will be exhibiting at the DFI 41st Annual Conference on Deep Foundations in New York, NY October 12-15. Visit us and learn about our UniSettle 4.0 and UniPile 5.0 software specifically designed for the design and analysis of deep foundations. Booth #104.

Online Activation Available

The activation code we provide at the time of purchase is machine-specific and designed to expire after a short time. If you are required to re-install your license in the future, you may obtain a new activation code via our online registration feature located under the main "Administration" menu of the software. All that is required is a valid e-mail address and your unique serial number. This process takes only a few seconds and is available 24/7.

New Contact Address

Last year we updated our domain name to UniSoftGS.com (from UniSoftLtd.com). Please update your address book. We may be contacted by e-mail at support@unisoftgs.com or by visiting our website at <https://www.unisoftgs.com/contact/>. UniSoftLtd.com will be discontinued as of December 31, 2016.

New Upgrade Available

If you have not yet acquired or upgraded to our new UniSettle 4.0 and UniPile 5.0, there is no better time to do so. Our new generation software is fully compatible with Microsoft Windows 7/8/10. It may be deployed on individual workstations or on your local or wide area network. Contact us at support@unisoftgs.com to receive your free trial version.

Dr. Fellenius One-Day Seminar

Dr. Bengt H. Fellenius will be presenting a one-day seminar in Milano and Lugano, Italy, in October 19 and 21, respectively, and in Singapore and Jakarta on November 18 and 21.

The title is Basics of Foundation Design and the topic is analysis, design, and testing of foundations supported on single piles as well as pile groups considering capacity and settlement.

More information may be obtained visiting https://www.unisoftgs.com/Uploaded/file/Milano_and_Lugano_Info.pdf or by replying to this message.

Dr. Fellenius expects to be presenting other seminars in the USA in 2017, but dates and venues are as yet undecided.
